

WELL-X-TROL PROFESSIONAL
Pre-Pressurized

Water System Tanks

WELL-X-TROL® Professional revolutionizes the industry

WELL-X-TROL® Professional redefined the industry with its advanced engineering and innovative product design including the pre-pressurized well tank, sealed-in air charge, and unique water chamber design. With proven performance since 1963, WELL-X-TROL Professional continues to deliver unparalleled results making it **the most trusted choice of professionals** in today's market. WELL-X-TROL Professional offers many unique features that result in consistent, reliable performance, including design elements that prevent tank corrosion and reduce wear and tear on the well pump.

Features and Benefits

Exclusive butyl diaphragm, along with the 100% corrosion resistant virgin polypropylene liner, are secured by a positive hoop ring seal for added strength and reliability. This totally integrated system outperforms other types of water chamber designs.

The stainless steel air valve is welded rather than threaded to prevent loss of air pressure.

The finest quality, custom mill steel is used in the deep drawn dome for extra strength while keeping tank weight to a minimum.

More choices mean more flexibility

WELL-X-TROL Professional offers more options and sizes than any other well tank manufacturer, including both vertical and horizontal designs, and sizes ranging from 2 gallons to 119 gallons so you can configure a system that's right for any application.

First on Industry Safety Standards

WELL-X-TROL Professional tanks were the first to meet all industry standards for quality and safety. The butyl diaphragm in all models meets EPA requirements for potable water as defined in the Safe Drinking Water Act of 1986. The entire tank which includes the virgin polypropylene liner, butyl diaphragm, and acceptance fittings for a 100% corrosion resistant water reservoir is listed by NSF International Standard 61.

Advanced

design features

continue to set industry standards

- Stainless steel air valve is welded in position rather than mechanically threaded to prevent loss of air pressure and to minimize stress on the well's pump system. It also carries a tamper-evident warning label.
- Deep-drawn steel domes offer twice the strength of rolled steel while minimizing weight.
- Unique positive hoop ring seal secures diaphragm and liner for added strength and reliability.
- Heavy duty butyl diaphragm features seamless construction for uniform strength and flexibility. It conforms exactly to the shell configuration without stretching, creasing, or forming bubbles or corners that could trap water or sediment. Butyl is the best known elastomer to prevent air loss.
- Heavy duty butyl diaphragm is extremely resistant to bacterial growth and meets FDA requirements for potable water supply.
- Virgin polypropylene liner provides a 100% corrosion resistant, non-metallic rigid water reservoir that is listed by NSF International Standard 61.
- Stainless-steel system connection withstands aggressive water.
- Exclusive welding process eliminates interior rough spots and sharp edges which prevent damage to the diaphragm and liner.
- Each finished tank is pressure tested for safety.
- Each finished tank is pre-pressurized to the most common pump cut-in pressure.
- Exterior appliance-like finish looks attractive while protecting the tank from the elements.

(Effective System Protection):

maximum system output with minimal pump starts

The ESP sizing procedure covers modern residential water-use habits, increased off-peak demands and the general increase in water use that have occurred over the past twenty-five years.

ESP sizing is designed to reduce pump wear and tear, and reduce energy consumption by keeping pump starts to a minimum.

Choose the amount of protection you need.

ESP I: Tank selection is based on approximately one minute minimum pump running time. This is recommended for pumps up to 3/4 H.P.

ESP II: Tank selection is based on approximately two minute minimum pump running time. This is recommended for 3/4 H.P. or larger pumps.

ESP Sizing Table

PUMP DISCHARGE RATE GPM (Approx.)	OPERATING PRESSURE - PSIG					
	20/40	ESP I 30/50	40/60	20/40	ESP II 30/50	40/60
5	WX-202	WX-202	WX-202	WX-202XL	WX-205	WX-205
7	WX-202	WX-202	WX-202XL	WX-205	WX-250	WX-251

35	WX-302	WX-350	WX-350	(2) WX-302	(2) WX-350	(2) WX-350
40	WX-350	WX-350	(2) WX-255	(2) WX-350	(2) WX-350	(3) WX-302

WELL-X-TROL Professional tank operation time-tested design

1
WELL-X-TROL Professional has a sealed in air chamber that is pre-pressurized before it leaves our factory. Air and water do not mix.

2
When the pump starts, water enters the WELL-X-TROL Professional. Only usable water is stored.

3
When the pressure in the chamber reaches cut-out pressure, the pump stops. The WELL-X-TROL Professional is filled.

4
When water is demanded, pressure in the air chamber forces water into the system. Since WELL-X-TROL Professional consistently delivers the maximum usable water, minimum pump starts are assured.

In-Line Models

Model No.	Dimensions		Total Volume (gals)	Max. Accept. Factor	System Drawdown			Shipping Wt. (Vol.) lbs (cu ft)
	Diameter (ins)	Height (ins)			20/40 (gals)	30/50 (gals)	40/60 (gals)	
WX-101	8	12 5/8	2.0	0.45	.8	.7	.6	5 (0.6)
WX-102	11	15	4.4	0.55	1.8	1.5	1.3	9 (1.2)
WX-103	11	22 1/4	7.6	0.42	3.1	2.6	2.2	15 (1.8)
WX-104	15 3/8	17 3/4	10.3	1.00	4.1	3.5	3.0	20 (2.6)
WX-200	15 3/8	22	14.0	0.81	5.6	4.8	4.1	22 (3.3)

Precharge Pressure for WX-101 & WX-102 is 20 PSIG and Sys. Conn. is 3/4" NPTM.
 Precharge Pressure for WX-103 is 30 PSIG and Sys. Conn. is 3/4" NPTM.
 Precharge Pressure for WX-104 and WX-200 is 30 PSIG and Sys. Conn. is 1" NPTM.
 Maximum Working Pressure is 125 PSIG and Maximum Working Temperature is 200° F.
 WX-101 and WX-102 models available with Ultra TUF-KOTE™ exterior coating option.

Stand Models

Model No.	Dimensions		Total Volume (gals)	Max. Accept. Factor	System Drawdown			Shipping Wt. (Vol.) lbs (cu ft)

WX-350	26	61 7/8	119.0	0.39	47.8	40.5	35	166

Precharge Pressure for WX-104-S thru WX-203 is 30 PSIG and Sys. Conn. is 1" NPTF.
 Precharge Pressure for WX-205 thru WX-350 is 38 PSIG and Sys. Conn. is 1 1/4" NPTF.
 Maximum Working Temperature is 200° F. Maximum Working Pressure for all models except WX-252 is 125 PSIG.
 Maximum Working Pressure for WX-252 is 100 PSIG.
 All models available with Ultra TUF-KOTE™ except WX-104-S, WX-201, and WX-252.
 All models except, WX-104S, WX-201, WX-252 are available with Pro-Access.

Precharge Pressure is 30 PSIG. System connection is 1" NPTF (straight coupling connection). Maximum Working Pressure is 125 PSIG. Maximum Working Temperature is 200° F.

Specialty Options

Ultra TUF-KOTE™

A new improved paint finish available only on WELL-X-TROL tanks. This new paint has been re-formulated for outdoor applications where acids, salts and moisture can harm regular paint. It is crack proof and impermeable to moisture.

PRO Access®

PRO Access Stainless Steel System Connection piped through the stand is available on most WELL-X-TROL models. Indicate PRO Access when ordering.
